Bangladesh

**3rd STEEL &  
RAW MATERIAL  
CONFERENCE**  
Emerging Bangladesh

SCRAP • DRI • HRC • TECHNOLOGY

**BSRM Plant &  
Yard Visit**

22nd Sep'22

# Snapshot of the Conference

SteelMint Events is pleased to organize the 3rd Steel & Raw Material Conference - Emerging Bangladesh (20 & 21st Sep'22) in conjunction with the BSRM Plant & Yard Visit (22nd Sep'22).

The conference will cover a wide range of topics, including the country's steel production and demand outlook; global scrap trade flow changes, particularly in the aftermath of the Russia-Ukraine war; the ship recycling scenario; key emerging sector price trends; and much more.

## About the Plant Visit

The Bangladesh Steel Re-Rolling Mills Ltd., commonly known as BSRM is South Asia's largest importer of ferrous scrap. Every year, it imports more than 1 million tonnes of scrap. Understanding the operation and technology of a high-volume scrap handling facility will be a significant draw. On September 22nd, delegates will have the opportunity to visit the production facility and scrap yard to examine the plant's technological advancement.

# Objectives

- To gain a better understanding of Bangladesh's steel production.
- To learn about the operations and technological innovations of South Asia's largest scrap handling facility.
- To assess the performance potential of ferrous scrap in the Electric Induction Furnace (EIF) route steel production.

## Introduction to BSRM

BSRM, Bangladesh's leading steel manufacturer, is one of the most prominent corporate houses in the country. Among its many other pioneering steps, it is the first to introduce an EMF-tested grade 500 rod, the first to pass 5 million cycling loading fatigue testing in the United Kingdom, and be certified to global standards. BSRM always looks into the need of the customers for which over the years it brought innovative products and services – like the production of a 50mm dia bar, especially for the deep piling requirement of Padma Bridge.

BSRM's specialized products are also designed to meet the specific needs of the construction industry.

Today, BSRM is the country's largest steel producer, with 7 production facilities and an annual melting capacity of 1.8 million tonnes via the induction furnace route.

## 7 Plants in Operation

**2.00** Mn MT  
Annual Melting Capacity

**2.00** Mn MT  
Annual Ferrous Scrap Imports

**2,00,000** MT  
Annual Sponge Iron Imports

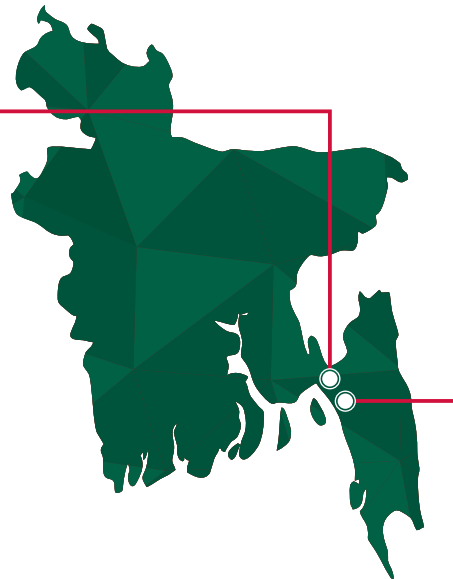

**24,000** MT  
Annual Wires Prod. Capacity

# Plant Information

Plant Name: **BSRM Steels LTD**  
Location: **Jorarganj, Mirsharai, Chattogram**  
Plant Establishment: **2017**  
Area: **40 Acres**  
Product: **Billet**  
Annual Production Capacity: **0.6 Million MT**

Plant Name: **BSRM Steel Mills LTD**  
Location: **Sonapahar, Mirsharai, Chattogram**  
Plant Establishment: **2015**  
Area: **55 Acres**  
Product: **Billet**  
Annual Production Capacity: **1 Million MT**

# Itinerary

**20<sup>th</sup> & 21<sup>st</sup>  
Sep'22**

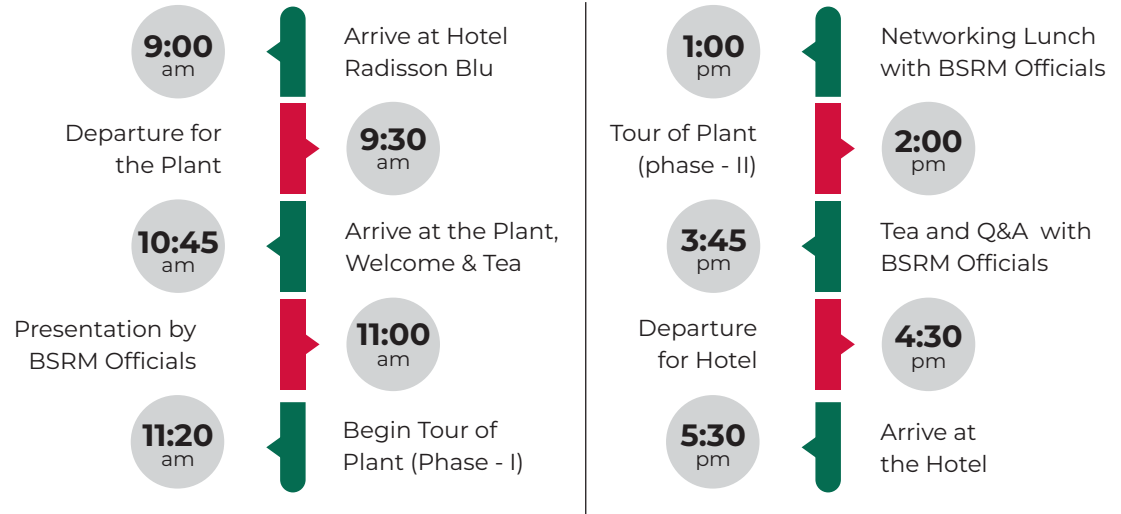

**3rd Steel & Raw  
Material Conference**

Hotel Radisson Blu,  
Chittagong

**22<sup>nd</sup>  
Sep'22**

## Inclusions

- The trip is Ex-Radisson Blu
- Domestic Travel (bus) to/from the plant
- Networking Tea & Lunch
- SteelMint Analyst to accompany the team

## Per Delegate Fee

**USD 100**

(not included in the Conference fee)

## Terms & Conditions

- For foreign attendees of the 3rd Steel & Raw Material Conference
- Participation will be subject to approval by BSRM Group
- Maximum 2 delegates allowed from each company
- Entry on a first-come-first-serve basis
- Last date to register for Visit – 7th Sep'22
- Visit Fee will be excluding the conference fee
