Bangladesh Economy

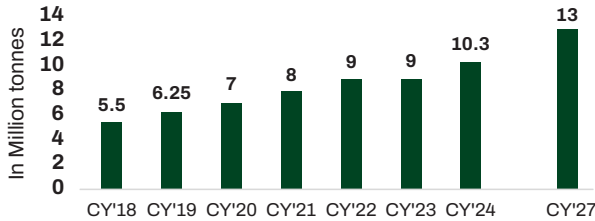

Bangladesh's economy is interlaced with potential, dynamism and resilience. It was one of the fastest growing countries in the world, with an average growth rate of 7%. The country is now taking a futuristic approach through embracing sustainable solutions for industries and power generation.

Steered by progression in infrastructure, construction & shipbuilding, the steel demand is expected to touch 15 mntpa by 2027. The cement industry, with its stable growth, is actively exploring opportunities to meet its clinker demand of 25 mtpa. While challenges for procurement of raw materials in

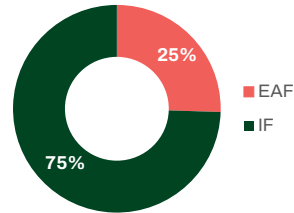

the steel and cement industry necessitates imports, it also presents Bangladesh a bigger opportunity for regional collaboration. The 26k MW power sector is mostly dependent on renewable sources, though it is swiftly transitioning into clean and green energy.

About the Conference

BigMint proposes to organise the 4th installation of our event- Bangladesh International Trade Summit- Sustainable Future.

Bangladesh, a strategically significant country for Asia-Pacific is emerging as a hotspot of growth through sustainable practices. The economic expansion is expected to encourage participation of more global companies and attract forex for the country.

The two-day conference shall bring together key stakeholders from steel, cement and power industries including industry leaders, policymakers, traders and investors. It shall provide a network for collaborative opportunities and a platform for discussion of trends and challenges in the market.

Why Bangladesh

Bangladesh has had a robust economic growth averaging nearly **7%** in the last decade

With a population of **172** million, Bangladesh presents a significant opportunity, offering a vast consumer market and a substantial pool of manpower.

Bangladesh, which is of high geographic and strategic importance, is witnessing greater investments and collaborations from countries like **China, Japan, India, Korea** among others.

The Ready-Made Garment Industry (RMG) is increasingly embracing solar energy as a sustainable power solution to align with compliance norms from Europe.

Bangladesh's steel consumption is estimated to reach **15** million tons by 2027

Country consistently purchases scrap from international sources, importing **5 mntpa** + scrap.

It is the second largest destination for ship dismantling in the world and is coming up with four **Green ship recycling** yards.

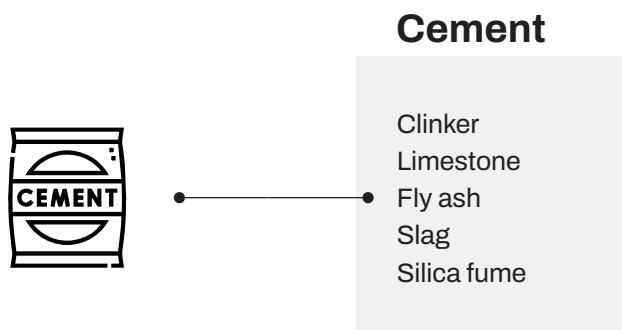

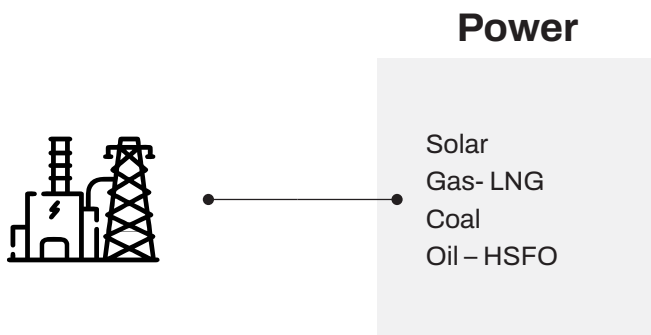

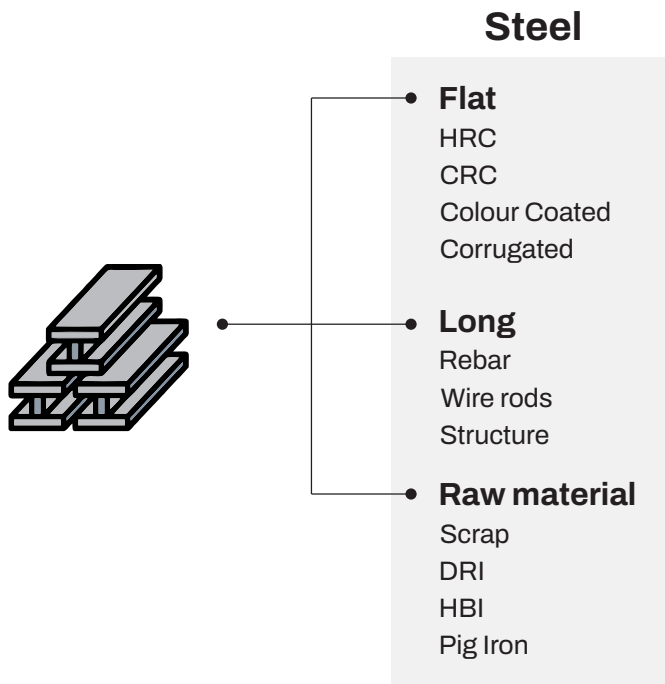

It is eyeing diversification into other key industries apart from its major **textile** industry.

The per capita steel consumption of **45kgs** is predicted to shoot up amidst greater infrastructural growth

It also imports raw materials for cement, majorly clinker and other materials such as **limestone, gypsum, fly ash** etc.
